Information

■ Information

- Is the life blood of our customers. During the design we manufacture information to enable that information to be used to procure and build a plant. We then use that extending information set to operate the plant safely and effectively.
- And LACK of accurate and timely information is the number ONE cause of SAFETY incidents
- LACK of accurate and timely information adds significant risk to the successful outcome of projects

Right Information

to the

Right Person

at the

Right Time

Vision

For every **Physical Asset...**

There should exist a **digital one**

AVEVA's PLM Strategy

Keep the Focus on

Lifecycle Management of

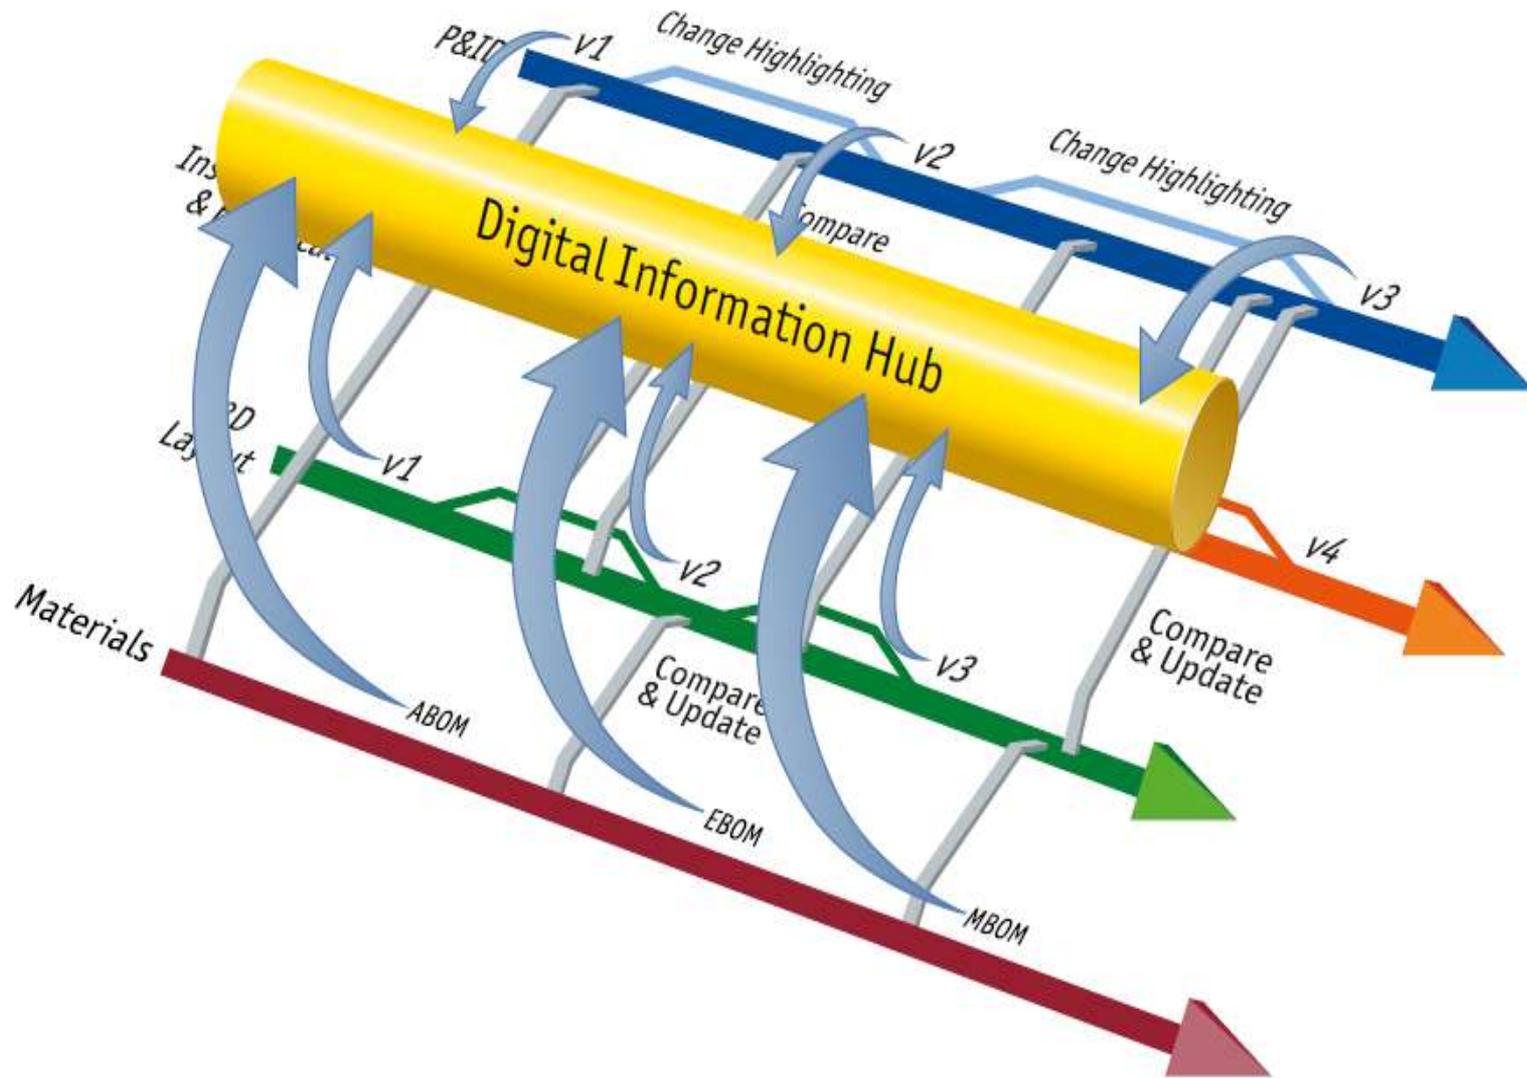

ASSETS being **CONTINUALLY ADAPTED**

DIH – for Assets being Continually Adapted

NOT for products made using rigid repeatable processes

How is the DIH achieved?
